

## BOTTLE-LOCKER™: Overcap Closure System

### DRUG SUBSTANCE SECURITY:

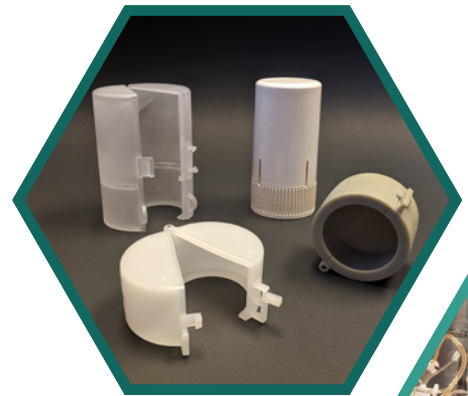

BioFlex Solutions introduces its high purity closure system for drug substance storage bottles. Easily protect drug substance and create a tamper proof cover on a bottle, container, or carboy used in BioPharmaceutical production. The simple, easy-to-use lockout cover snaps in place in seconds, adding another level of protection to your final product.

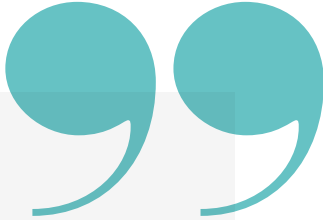

### AVOIDING ISSUES WITH BOTTLES:

Maintaining drug product substance safety throughout production is critical to a process. Current storage bottles are convenient to use, but their simple screw top design can easily be opened or tampered. Common bottle failures occur at the bottle cap tubing system. The Bottle Locker will easily protect the tubing closure while eliminating the potential for accidentally exposing the bottle contents to the environment.

### APPLICATIONS:

- > Freeze Thaw
- > Drug Product Protection
- > Viral Containment
- > Product Transportation
- > Cell and Gene Therapy

ELIMINATE  
THE RISK  
ASSOCIATED  
WITH SHIPPING  
BOTTLES WITH  
COMMON  
SCREW CAPS.

#### NEXT LEVEL PRODUCT PROTECTION:

The Bottle Locker™ Closure System was designed to act as a tamper evident system for active ingredient that aligns with similar industry regulations currently required by law on final product.

#### FEATURES:

- > Fits Industry standard bottles
- > 100mL to 20 Liters
- > Patent Pending design
- > Tamper Evident and Tamper Proof
- > Easy to validate

#### ORDERING INSTRUCTIONS

|   |                          |                                      |
|---|--------------------------|--------------------------------------|
| 1 | Select Bottle Type       | Media Bottle, BioTainer, Carboy      |
| 2 | Confirm Closure Thread   | 38-430, 48 mm, GL 45                 |
| 3 | Determine Closure Height | Standard cap, cap with tubing insert |
| 4 | Any Custom Requirements  | Material of construction, lockout    |
